

Our Environmental Policy

Attard Bros Group is fully committed to the protection of human health and the environment through regulatory compliance and the continuous review of our operations. We believe it is both good business practice and our duty to protect the natural and cultural resources of the communities we serve.

We intend to meet this commitment through the application of the following principles:

- **Integrate environmental** concerns as an integral part of our planning and decision-making processes.
- **Commit sufficient resources** to implement effective environmental programs.
- **Practise good environmental management** at all construction sites, company-owned facilities, and properties under our management.
- **Educate employees** to be accountable for environmental stewardship and encourage them to seek innovative ways to improve the environmental aspects of our operations and continually improve our environmental program.
- **Avoid, minimize, and mitigate** any adverse environmental impacts caused by our operations where possible.
- **In our product development**, to prioritize sustainable design, the use of eco-friendly materials, and resource efficiency, ensuring that our products minimize environmental impact throughout their lifecycle, while promoting reuse, recycling, and the circular economy.
- **Promote the efficient use** of energy and natural resources through cost effective conservation and energy management programs.
- **Ensure the proper handling and disposal** of all waste and minimize their creation while pursuing opportunities to prevent pollution and recycle and reuse waste materials.
- **Evaluate our environmental performance** through periodic reviews and audits to ensure that our conduct is consistent with these principles.
- **Continually improve** the suitability, adequacy and effectiveness of the environmental management system to enhance the environmental performance.
- **Support the United Nations Sustainable Development Goals (SDGs)**, particularly those related to environmental sustainability, by integrating responsible practices that contribute to climate action, resource efficiency, and ecosystem protection.
